Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 5/2/2006.

DETAILED ACTION

Response to Arguments

1. Applicants' arguments with respect to claims 1 and 5-9 have been considered but are moot in view of the new ground(s) of rejection. Since the new grounds of rejection was not necessitated by Applicants' amendment the instant Office action remains non-final.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1, 5, and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Pat. No. 6,776,390 (Boecking). Boecking discloses a piezoelectric valve comprising a valve main body (portion of element 1 adjacent element 15 in figure 1), a pressure chamber (chamber containing element 16 in figure 1), an outlet (21), a valve body (15), a piezoelectric element (2), at least one displacement enlarging mechanism (10), wherein the piezoelectric actuator (2) and

Art Unit: 3751

the displacement enlarging mechanism (10) are mechanically connected (via element 5), wherein the valve body (15) is opened by applying voltage to the piezoelectric element (col. 4, lines (1-16), a valve seat (17), and a base plate (portion of element 1 adjacent element 12 in figure 1).

Regarding the recitation of "air" with the claims, the examiner does not consider this term to limit the claim since any type of fluid can be controlled by a valve.

Regarding the recitation of "a granular material sorting machine" in the preamble of claim 1, the examiner does not consider this term to breathe life and meaning into the claim since the structure is not referred back to in the body of the claim.

Allowable Subject Matter

4. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6,062,532 (Gurich et al.) disclose a valve having a piezoelectric actuator and a displacement enlarging mechanism.
